EDUCATION

- **Saarland University** Saarbrücken, Germany
MSc in Computer Science Oct 2025 – Present
- **Sharif University of Technology (SUT)** Tehran, Iran
BSc in Computer Engineering Sep. 2019 – Jul. 2024

PUBLICATIONS

- **Structure Matters: Evaluating Multi-Agent Orchestration in Generative Therapeutic Chatbots.**
Proceedings of the 8th ACM Conference on Conversational User Interfaces (CUI), 2026.
- **Toward Inclusive Low-Code Development: Detecting Accessibility Issues in User Reviews.**
Proceedings of the 29th International Conference on Evaluation and Assessment in Software Engineering (EASE), ACM, 2025.
- **User Voices, Platform Choices: Social Media Policy Puzzle with Decentralization Salt.**
Extended Abstracts of the ACM CHI Conference on Human Factors in Computing Systems (CHI EA), 2024.

RESEARCH EXPERIENCE

- **UKP Lab, TU Darmstadt** Remote
Research Assistant (HiWi) Mar 2026 – Apr 2026
 - **LLM Inference and Evaluation:** Conducted research on efficient inference and evaluation of large language models under resource constraints.
 - **Evaluation Framework:** Extended the CheckEval framework by designing task-specific evaluation benchmarks and adapting it to project requirements.
 - **Model Benchmarking:** Benchmarked and analyzed open-source transformer models across different configurations, comparing performance, memory usage, and computational efficiency on GPU clusters.
 - **Experimental Evaluation:** Annotated datasets and systematically evaluated multiple model responses to identify high-quality outputs and support reproducible experimentation.
- **Imperial College London** Remote
Research Assistant Sep 2023 – Sep 2025
 - **Conversational AI for Mental Health:** Developed a psychotherapy chatbot combining machine learning and Self-Attachment Therapy to deliver personalized therapeutic conversations.
 - **System Development:** Designed the React.js frontend and collaborated on Django backend integration to improve conversational flow and usability.
 - **User Studies:** Designed and conducted user studies to evaluate conversation quality, usability, and therapeutic user experience.
- **Deakin University & RMIT University** Remote
Research Assistant Sep 2023 – Dec 2025
 - **Accessibility Research:** Investigated accessibility issues in low-code applications through a multi-institutional research collaboration.
 - **Dataset Construction:** Built and manually annotated a dataset of 4,762 low-code application reviews collected from multiple commercial platforms.
 - **Hybrid NLP Model:** Developed a hybrid classifier combining transformer sentence embeddings with rule-based features, achieving **78.52% F1-score**, **78.07% accuracy**, and **82.70% recall**, outperforming multiple transformer baselines.
- **Sharif University of Technology** Tehran, Iran
Research Assistant Oct 2023 – Mar 2024
 - **Human-Centered AI:** Investigated democratic content moderation by comparing users' policy preferences with platform moderation strategies and LLM-generated decisions.

- **User Studies:** Designed and conducted a study with 110 participants, collecting over 3,000 interactions across 546 social media posts.
- **Policy Learning:** Developed a transformer-based multi-task learning model with uncertainty estimation, achieving **79.82% accuracy** in predicting users' preferred moderation policies.
- **Research Output:** Published as a Late-Breaking Work at the *ACM CHI Conference on Human Factors in Computing Systems (CHI 2024)*.

• Institute of Science and Technology Austria (ISTA)

Klosterneuberg, Austria

Research Assistant

Jul 2022 – Sep 2022

- **Computer Graphics and Physics Simulation:** Contributed to research on physics simulation and computer graphics, supporting rendering and visualization pipelines.
- **Rendering Optimization:** Optimized large-scale rendering meshes using the Magnum graphics engine to improve performance and stability for graphics-intensive simulations.

EXPERIENCE

• cafebazaar.ir

Tehran, Iran

Software Engineer (Frontend)

Jul 2025 – Dec 2025

- **Frontend Development:** Developed and maintained scalable user-facing applications using React, Nuxt.js, and Vue 3, emphasizing performance, usability, and maintainability.
- **UI Engineering:** Built responsive and accessible user interfaces, managed application state, and integrated frontend components with backend services.
- **Software Quality:** Improved code reliability through unit testing and applied frontend security best practices for robust production deployments.

• international.cafebazaar.ir

Tehran, Iran

Software Engineer

Jul 2024 – Jul 2025

- **Platform Development:** Developed core user-facing features for the international CaféBazaar platform using React.js and Django.
- **Authentication System:** Implemented secure login, registration, verification code, and confirmation email workflows.
- **Application Management:** Developed APK upload and management functionality, enabling users to submit and manage applications through their profiles.
- **Deployment:** Collaborated on backend integration, version control, and deployment using Django, Git, Nginx, and database systems.

SKILLS

- **Programming Languages:** Python, C++, JavaScript, TypeScript
- **Machine Learning:** PyTorch, Hugging Face Transformers, vLLM
- **NLP:** Large Language Models, Transformer Models, Text Classification, Model Evaluation
- **Research:** Experimental Design, User Studies, Dataset Annotation, Error Analysis, Benchmarking, Ablation Studies
- **Web Development:** React.js, Vue 3, Nuxt.js, Django
- **Tools:** Git, Slurm, Linux, GPU Computing, Nginx
